

## **COP1210C Who Wants to Be a Java Programmer? v.3**

*25 points*

*Repetition Structures*

**File name:** *javaGamev3.java*

- (3) Create an algorithm.
- (4) Add 2 more sets of questions and answers. These questions should come from the topics in Chapter 4.
- (6) Use a do...while loop to validate the main menu choice and to allow the user to play as many times as he/she wishes.
- (8) Use a do...while loop to validate the choices for each question.
- (2) Display the user's total points after each question is answered.
- (2) Include documentation in your code to explain the updates that were made to this version.
